List of figures	<i>page</i> xii
List of tables	xiv
Foreword by Gustav Jahoda	xv
Preface to the first edition	xvii
Preface to the second edition and acknowledgments	xix
Acknowledgments	xxi
1 Introduction to cross-cultural psychology	1
What is cross-cultural psychology?	1
Goals of cross-cultural psychology	3
Relationships with other disciplines	5
Ethnocentrism in psychology	8
A general framework for cross-cultural psychology	10
Conclusions	14
Key terms	15
Further reading	15
Part I Similarities and differences in behavior across cultures	
2 Cultural transmission and individual development	19
Cultural and biological transmission	20
Early development and caretaking	21
Enculturation and socialization	29
Adolescence	39
Moral development	39
Conceptualizations of development	44
Conclusions	49
Key terms	50
Further reading	50
3 Social behavior	52
Sociocultural context	53
Conformity	57
Values	59
Individualism and collectivism	65

Social cognition	71
Gender behavior	73
Conclusions	84
Key terms	84
Further reading	84
4 Personality	86
Traits across cultures	87
Self in social context	100
Conceptions of the person	104
Altered states of consciousness	109
Conclusions	113
Key terms	113
Further reading	113
5 Cognition	114
General intelligence	115
Genetic epistemology	131
Cognitive styles	137
Contextualized cognition	143
Conclusions	145
Key terms	146
Further reading	146
6 Language	147
Language development	147
Linguistic relativity	149
Universals in language	165
Bilingualism	168
Conclusions	170
Key terms	171
Further reading	171
7 Emotion	172
Understanding “others”	173
Universality of emotions	176
Emotions as cultural states	185
Componential approaches	188
Conclusions	194
Key terms	195
Further reading	195
8 Perception	196
Historical roots	197
Sensory functions	199

Perception of patterns and pictures	202
Face recognition	214
Psychological esthetics	216
Conclusions	220
Key terms	221
Further reading	221

Part II Pursuing relationships between behavior and culture: research strategies

9 Approaches from cultural anthropology	225
Conceptions of culture	225
Ethnography	233
Psychological anthropology	241
Cognitive anthropology	249
Conclusions	253
Key terms	253
Further reading	253
10 Biology and culture	255
Evolution and adaptation	255
Behavior genetics	265
Ethology	271
Models of cultural transmission	280
Conclusions	283
Key terms	284
Further reading	284
11 Methodological concerns	286
Qualitative methodology	287
Designing culture-comparative studies	294
Psychological data in cultural context	301
Analysis of equivalence	304
Classification of inferences	312
Conclusions	315
Key terms	315
Further reading	315
12 Theoretical issues in cross-cultural psychology	317
Inferred antecedents	320
Absolutism, relativism, and universalism	324
Conceptualizations of behavior–culture relationships	328
Beyond current controversies?	336

Conclusions	340
Key terms	341
Further reading	341

Part III Applying research findings across cultures

13 Acculturation and intercultural relations	345
Plural societies	346
Acculturation	349
Intercultural strategies	353
Psychological acculturation	360
Adaptation	369
Intercultural relations	371
Multiculturalism	375
Conclusions	381
Key terms	382
Further reading	382
14 Organizations and work	384
Organizational structure	384
Managerial behavior	391
Work values and motives	399
Conclusions	405
Key terms	406
Further reading	406
15 Communication and training	407
Intercultural communication	407
Communication training	413
Negotiation	418
Conclusions	421
Key terms	422
Further reading	422
16 Health behavior	423
Culture and health	423
Psychopathologies across cultures	428
Positive mental health	435
Cultural factors in psychotherapy	437
Cultural factors in health behavior	442
Ecology, population, and health	450
Conclusions	453
Key terms	454
Further reading	454

17 Psychology and the majority world	456
Impact of Western psychology	456
Indigenous psychologies	459
Psychology and national development	464
Conclusions	470
Key terms	470
Further reading	471
Epilogue	472
Key terms	475
References	483
Author index	561
Subject index	577
