

NEUROSCIENCE AND CRITIQUE

Exploring the Limits of the
Neurological Turn

Sondersammelgebiet
Volks- und Völkerkunde
in Zusammenarbeit mit der DFG

Edited by Jan De Vos and Ed Pluth

CONTENTS

<i>List of Contributors</i>	vii
Introduction: Who Needs Critique? <i>Jan De Vos and Ed Pluth</i>	1
PART I	
Which Critique?	9
1 The Brain: A Nostalgic Dream: Some Notes on Neuroscience and the Problem of Modern Knowledge <i>Marc De Kesel</i>	11
2 What is Critique in the Era of the Neurosciences? <i>Jan De Vos</i>	22
3 Who Are We, Then, If We Are Indeed Our Brains? Reconsidering a Critical Approach to Neuroscience <i>Nima Bassiri</i>	41
4 Neuroscientific Dystopia: Does Naturalism Commit a Category Mistake? <i>Peter Reynaert</i>	62
PART II	
Some Critiques	79
5 From Global Economic Change to Neuromolecular Capitalism <i>Jessica Pykett</i>	81

6	What is the Feminist Critique of Neuroscience? A Call for Dissensus Studies <i>Cynthia Kraus</i>	100
7	Brain in the Shell: Assessing the Stakes and the Transformative Potential of the Human Brain Project <i>Philipp Haueis and Jan Slaby</i>	117
8	Confession of a Weak Reductionist: Responses to Some Recent Criticisms of My Materialism <i>Adrian Johnston</i>	141
PART III		
Critical Praxes		171
9	The Role of Biology in the Advent of Psychology: Neuropsychanalysis and the Foundation of a Mental Level of Causality <i>Ariane Bazan</i>	173
10	Embodied Simulation as Second-Person Perspective on Intersubjectivity <i>Vittorio Gallese</i>	188
11	Empathy as Developmental Achievement: Beyond Embodied Simulation <i>Mark Solms</i>	203
Afterword		221
12	The Fragile Unity of Neuroscience <i>Joseph Dumit</i>	223
	<i>Index</i>	231
