Figures and Tables .....	xiii
About the Editors and Authors .....	xvii
Preface .....	xxiii
Introduction-- <i>Priscilla Copeland Reining</i> .....	1
The Village and Its Completeness	9
Villagers and Their Cohesiveness	11
Structural Inclusiveness	12
The Whole and the Parts	14
References	15
PART 1. THE VILLAGE DEFINED	
1 On the Viability of Villages-- <i>Margaret Mead</i> ...	19
References	32
PART 2. STUDIES OF THE VILLAGE	
2 Millenium of Modernization: A Changing German Village-- <i>Jack M. Weatherford</i> .....	35
Pre-History	37
Industrialization	45
Post-Industrial Development	49
The Changing Moral Community	54
<i>The Saxons, 56; The Refugees, 59;</i> <i>The Guest Workers, 61</i>	

	Conclusions	63
	References and Notes	66
3	Balancing on an Alp: Population Stability and Change in a Swiss Peasant Village-- <i>Robert McC. Netting and Walter S. Elias</i> .....	69
	Peasant Population Equilibria	69
	Demographic History of an Alpine Community	71
	Total Population Dynamics	73
	Mortality	79
	The Constancy of Marriage	86
	Fertility and Fecundity	91
	The Fruitfulness of Potatoes	99
	Summary and Conclusions	101
	References and Notes	102
4	The Transformation of Hungarian Villages-- <i>Conrad C. Reining</i> .....	109
	References and Notes	121
5	Time Perspectives in Village India-- <i>Charlotte Wiser</i> .....	123
	References	159
6	The Middle Eastern Village in Regional Perspective -- <i>Daniel G. Bates</i> .....	161
	Summary and Concluding Remarks	178
	References and Notes	180
7	Continuities and Discontinuities in China: The Natural Village and the Production Brigade-- <i>Molly G. Schuchat and James D. Jordan</i> ...	185
	Introduction	185
	No One Typical Village	187
	Evolution of the Natural Village	188
	<i>The Family Home, 189; The Pao-Chia Control System, 190; Public Works and Utilities, 191; The Market Town and Village Industry, 192; The Village and the State, 193</i>	

Communes and the Production Brigade	195
<i>Mutual Aid Teams and Agricultural Producers Cooperatives, 196</i>	
Present-Day Observations	197
<i>Population Movements, 197; Communication--Ties Between City and Countryside, 199; Effect of Self-Reliance, 200; Future of the Village in China, 202</i>	
References and Notes	203

PART 3. DEVELOPMENT AND THE VILLAGE

8	The Future of Rice Monocultures in Malaysia-- <i>Clive Bell</i> .....	207
I.	Malaysia's Paddy Sector in Its National Setting	208
II.	The Economic and Social Organisation of Paddy Production	210
III.	The Sectoral Picture: Supply, Demand and Prices	217
IV.	The Economic and Social Organisation of Paddy Production in the Future	224
V.	Some General Conclusions	230
	References and Notes	231
9	The Role of the Village in Sahelian Development -- <i>David Shear</i> .....	235
I.	Introduction and Overview	235
<i>Background of the Drought, 235; The Long-Term Response to the Sahelian Drought, 236; Village Emphasis, 238</i>		
II.	Village and Underdevelopment in Historical Perspective	239
<i>Examples of Permanence and Change, 239; Forced Migration and New Lands Settlement, 243; Other Historical Constraints, 244</i>		

III. Promoting Village Development through the Sahel Development Program	245
<i>Using Basic Human Needs as an Approach to Integrated Rural Development, 249; Health, 251; Demographic and Health Planning, 252; Components of an Integrated Village-Based System, 253; Implementation: Timing and Decentralization, 257; Reinforcing the Village-Based Approach, 257; The Donor Community's Ability to Respond to Village-Based Activities, 259</i>	
References and Notes	263
Bibliography	265

10 New Village Uses of Renewable Energy Sources--James W. Howe .....269

I. Current Energy Use in Developing Countries	269
<i>A. Not Much Modern Energy is Used, 269; B. Most Modern Energy Use is Concentrated in Urban Areas, 271; C. Much Traditional Energy is Used in Rural Areas, 271</i>	
II. The Connection Between Energy and Development	272
III. Conventional Sources of Modern Energy	273
<i>A. Petroleum, 273; B. Nuclear, 273; C. Other Site Specific Sources, 274</i>	
IV. Solar Energy Technology	275
<i>A. Mini-Hydroelectric Generators, 275; B. Wind, 275; C. Generating Methane Gas from Organic Wastes, 276; D. Photovoltaic, or Solar Cells, 277; E. Simple Flat Plate Solar Collector, 277</i>	
V. Solar Energy Costs	277
VI. Testing Solar Energy Potential	279
<i>A. The Need for Village Level Tests, 279; B. The Nature of the Tests, 280</i>	

VII. Summary	284
Notes	284

11 The Political Economy of Education for Village Development--*John Simmons* .....287

I. Types of Education	288
II. Failure of Present System	289
III. Solutions	292
IV. "Expert Solutions"	294
V. Conflicting Theories	295
VI. Outlook	297
VII. Strategy	299
VIII. Illustrations of Education for Self-Reliance	300
<i>The Problem-Posing Method:</i>	
<i>Brazil,301; Reaching the Poor by Radio: Columbia,301; Education through Rural Cooperatives: Bangladesh,303;</i>	
<i>Barefoot Doctors: China,304; Building Local Initiative: Senegal,305; Self-Reliance for Community Needs: Sri Lanka,306</i>	
IX. Policy Issues	307
Annex I	309
<i>The Widening Gap: Literacy and Formal Education,309</i>	
References	313

12 Human Development in Traditional and Modernizing Villages--*Michael Maccoby*.....315

Psychosocial Needs	323
References and Notes	323

Comment-- <i>Shahid Javed Burki</i> .....	325
Reply-- <i>Michael Maccoby</i> .....	331

PART 4. DISCUSSION

13 A Concluding Comment--*Francis P. Conant* .....335

Universal Aspects of Villages	335
Field Studies	340
Viability	344

Index .....	345
