

COMPANION
TO THE
HISTORY OF
MODERN SCIENCE

EDITED BY
R. C. OLBY, G. N. CANTOR,
J. R. R. CHRISTIE and M. J. S. HODGE

ROUTLEDGE
LONDON AND NEW YORK

CONTENTS

<i>Preface</i>	xi
Introduction	xiii
<i>The Editors</i>	

PART I: THE STUDY OF THE HISTORY OF SCIENCE

Section IA: History of science in relation to neighbouring disciplines

1. The development of the historiography of science
J. R. R. Christie 5
2. The history of science and the working scientist
John R. G. Turner 23
3. The history of science and the history of society
Roy Porter 32
4. The history of science and the philosophy of science
Larry Laudan 47
5. Sociological theories of scientific knowledge
Barry Barnes 60

Section IB: Analytical perspectives

6. Marxism and the history of science
Robert M. Young 77
7. The sociology of the scientific community
Trevor Pinch 87
8. Feminism and the history of science
J. R. R. Christie 100
9. Language, discourse and science
J. V. Golinski 110

Section IC: Philosophical problems

10.	Continental philosophy and the history of science <i>Gary Gutting</i>	127
11.	Discovery <i>T. Nickles</i>	148
12.	Rationality, science and history <i>Larry Briskman</i>	166
13.	Realism <i>W. H. Newton-Smith</i>	181

PART II: SELECTED WRITINGS IN THE HISTORY OF SCIENCE

Section IIA: Turning points

14.	The Copernican revolution <i>J. R. Ravetz</i>	201
15.	The Scientific Revolution <i>John A. Schuster</i>	217
16.	Newton and natural philosophy <i>Alan Gabbey</i>	243
17.	The chemical revolution <i>Carleton E. Perrin</i>	264
18.	Laplacian physics <i>Robert Fox</i>	278
19.	Natural history, 1670–1802 <i>Phillip R. Sloan</i>	295
20.	The history of geology, 1780–1840 <i>Rachel Laudan</i>	314
21.	Energy <i>Crosbie Smith</i>	326
22.	Electromagnetic theory in the nineteenth century <i>M. Norton Wise</i>	342
23.	Cell theory and development <i>Jane Maienschein</i>	357
24.	Origins and species before and after Darwin <i>M. J. S. Hodge</i>	374
25.	William Wundt and the emergence of experimental psychology <i>K. Danziger</i>	396
26.	Behaviourism <i>Roger Smith</i>	410
27.	Freud and psychoanalysis <i>Raymond E. Fancher</i>	425

28.	The theory of relativity <i>John Stachel</i>	442
29.	Quantum theory <i>Michael Redhead</i>	458
30.	Classical economics and the Keynesian revolution <i>Bill Gerrard</i>	479
31.	From physiology to biochemistry <i>Neil Morgan</i>	494
32.	The molecular revolution in biology <i>Robert Olby</i>	503
33.	The emergence of genetics <i>Robert Olby</i>	521
34.	Cybernetics and information technology <i>Michael S. Mahoney</i>	537

Section IIB: Topics and interpretations

35.	Aristotelian science <i>A. George Molland</i>	557
36.	The heart and blood from Vesalius to Harvey <i>Andrew Wear</i>	568
37.	Magic and science in the sixteenth and seventeenth centuries <i>John Henry</i>	583
38.	Atomism and the mechanical philosophy <i>Martin Tamny</i>	597
39.	Newtonianism <i>Simon Schaffer</i>	610
40.	Physical optics <i>G. N. Cantor</i>	627
41.	Cosmology: Newton to Einstein <i>Pierre Kerszberg</i>	639
42.	Geometry and space <i>J. J. Gray</i>	651
43.	Particle science <i>Helge Kragh</i>	661
44.	The foundations of mathematics <i>Philip Kitcher</i>	677
45.	Probability and determinism, 1650–1900 <i>Ian Hacking</i>	690
46.	The mind-body problem <i>Robert M. Young</i>	702
47.	Paradigmatic traditions in the history of anthropology <i>George W. Stocking</i>	712

48.	Physiology and experimental medicine <i>John V. Pickstone</i>	728
49.	Geography <i>David N. Livingstone</i>	743
Section IIC: Themes		
50.	Science and religion <i>John Hedley Brooke</i>	763
51.	Science and literature <i>Gillian Beer</i>	783
52.	Science and philosophy <i>George Macdonald Ross</i>	799
53.	The development of philosophy of science, 1600–1900 <i>Ernan McMullin</i>	816
54.	The development of philosophy of science since 1900 <i>M. J. S. Hodge and G. N. Cantor</i>	838
55.	The classification of the sciences <i>Nicholas Fisher</i>	853
56.	Marginal science <i>Seymour H. Mauskopf</i>	869
57.	Science, alienation and oppression <i>Robert M. Young</i>	886
58.	Orthodoxies, critiques and alternatives <i>J. R. Ravetz</i>	898
59.	Nationalism and internationalism <i>Brigitte Schroeder-Gudehus</i>	909
60.	Science and imperialism <i>Lewis Pyenson</i>	920
61.	Science and war <i>D. E. M. Edgerton</i>	934
62.	Science education <i>W. H. Brock</i>	946
63.	The organisation of science and its pursuit in early modern Europe <i>Roger L. Emerson</i>	960
64.	Professionalisation <i>J. B. Morrell</i>	980
65.	Science and the public <i>Steven Shapin</i>	990
66.	Science and political ideology, 1790–1848 <i>Dorinda Outram</i>	1008

CONTENTS

67. Natural science and social theory	
<i>Theodore M. Porter</i>	1024
<i>The Contributors</i>	1044
<i>Index of names</i>	1047
<i>Index of subjects</i>	1060
